JOIN OUR MISSION TO DEFEAT CHD

40K

CONGENITAL HEART DISEASE is the most common birth defect.

Occuring in **1** in **100** births.

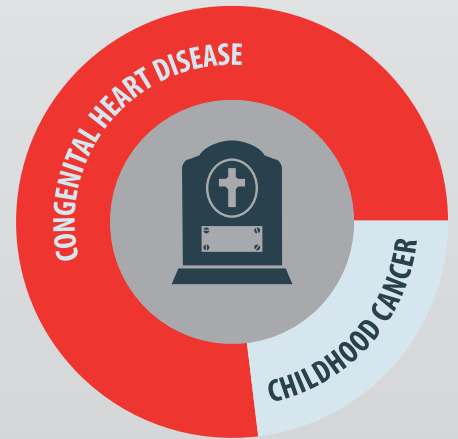

40,000 babies are born with CHD each year in the U.S.
Twice as many children die from CHD each year than all forms of pediatric cancer combined

CHD research is **grossly underfunded**. Why is CHD research so underfunded? Because it's a **hidden disease** that many don't know exists.

CHD is **60X** more prevalent than childhood cancer, yet pediatric cancer research funding is **5X HIGHER**.

Nearly **6,000** children die from CHD each year in the US. compared to approximately **1,800** who die from childhood cancer.
